# FRANK DVORAK

## FRONT END WEB DEVELOPER

### ABOUT ME

I am a self-taught front-end web developer experienced with HTML5, CSS3, JavaScript, jQuery, React etc. Examples of my work can be seen on my personal website and GitHub profile (links on the left)

I enjoy building interactive web experiences and learning new things. I focus on front-end now but eventually intend to become a full-stack developer.

### TECHNICAL SKILLS

**React JS:** building and deploying fast single-page applications (thanks to virtual DOM + React Router) as well as creating components for modular and reusable code. I am also familiar with the basics of Angular 6 and Vue.js

**HTML5, CSS3:** I have more than 10 years of experience with both HTML and CSS and enjoy keeping up with and using the new features.

**JavaScript:** for smaller projects I find that 'Vanilla JavaScript' performs better than using frameworks/libraries. I try to avoid bloat if possible.

**jQuery:** I have been moving away from jQuery towards React lately, but it is still useful for AJAX calls or simple websites if I want clean, readable code.

**Bootstrap/Material-UI(React)...:** UI frameworks make my job easier and more time efficient, especially while implementing responsive design (mobile first approach), although I still prefer using pure, fully customizable CSS, whenever the project allows it.

### OTHER SKILLS

**Quick learner:** My current job is a fast paced sales environment. I am used to always adapt to new changes and to work with new people. Excellent analytical and problem solving skills are required for my daily work.

**Attention to detail:** While working for Post Office I have developed exceptional attention for detail, which makes my work with JavaScript easier, because we spend more time looking at code than actually writing it.

**Communication + Team work:** My current employer is a big company where tasks are split between departments. In such an agile environment communication and coordination between team members and with other departments is crucial to meet targets and deliver results.

**Problem solving:** As a software developer I learned to trace problem to its root and try to resolve it efficiently, which sometimes translates to other areas of my life.

**Flexibility:** I am passionate about my work and will be happy to work long hours if the project demands it.

**Other computer skills:** Microsoft products, Windows command line, Adobe Illustrator, Adobe Photoshop, APIs,

**Languages:** English, Czech

## WORK EXPERIENCE

(2017 – present)

### **ACCOUNT MANAGER / TEAM TRAINER**

#### **XLN TELECOM (London)**

- Selling broadband packages and card machines
- Verbal contract verification
- Managing payments
- Listening and investigating call recordings
